DUTIES & RESPONSIBILITES

JavaScript Frameworks

- Develop and maintain user-facing features using ReactJS, Next.js, and TypeScript, ensuring high performance and responsiveness.
- Collaborate with design and backend teams to translate UI/UX designs into code, ensuring seamless integration with backend services.
- Optimize application performance by implementing best practices and optimizing code for faster rendering and reduced load times.
- Implement state management solutions such as Redux or Context API to manage complex application state and data flow.
- Conduct code reviews and provide constructive feedback to team members to ensure codebase consistency and quality.
- Collaborate with cross-functional teams to define technical requirements and drive the implementation of features and functionalities.

CMS - WordPress & PrestaShop

- Design and develop custom themes from scratch.
- Helping formulate an effective, responsive design or PSD and turning it into a working theme and plugin.
- Ability to create custom shortcode (enclosing & self-closing shortcode).
- Ensuring pixel-perfect implementation and responsiveness across devices.
- Optimize websites for speed, performance, and SEO, including image optimization, caching, and implementing best practices for frontend development.
- Conduct code reviews and provide feedback to ensure code quality, maintainability, and adherence to WordPress coding standards.
